

Electrical connection: (Circuit board in lower part)

Common connection of light and sounder (factory setting)

Separate connection of light and sounder

Acoustic settings and Tone selection (Circuit board in sounder upper part)

S1B S1A	Diode not bridged Polarity negative Factory setting
S1B S1A	Diode not bridged Polarity positive
S1B S1A	Diode bridged Polarity negative
S1B S1A	Diode bridged Polarity positive

S1B: Selection of control voltage polarity for C1 and C2 (external control)

S1A: Bridging of the integrated rectifier diode

The desired tone can be selected using the **S3** tone selector switch. The tone is generated after the supply voltage is applied. A complete tone type table can be found in the Annex. See the digital operating instructions for the external control of other tones, source: www.pfannenbergl.com/manuals
